Graphic Designer

With over 7 years of experience as a graphic designer and design manager, I've been on a journey to find the best design solutions for a variety of industries including oil, construction, electronics, banking, software and more. I firmly believe that good design is a critical element for businesses to develop and expand. It's a great joy for me to utilize my skills and experience to impact this process.

Illustrator

It all started with pencil drawings. First, it was just a hobby, but it eventually became a professional pleasure. As an illustrator, I incorporate my drawing skills into nearly every project, creating a unique style for each design solution. Besides using illustrations in most projects, I also developed myself as an individual artist and started creating numerous illustrations for pure enjoyment. Even though it's still a professional hobby, it's also a desired skill for many
